**New Features in Grapher 24**

There are several new features in the latest release of Grapher! The top new features are listed below. A more complete list of the new features can be found on the Grapher Version History page. To see the features added to previous versions of Grapher, see the PDFs below.

If you're curious about how these new features can improve your workflow, download the Grapher Free Trial and test them out today!

-Top Features in Grapher's Latest Release-

Move or Copy Document Pages

A longtime feature that has existed in Excel is coming to Grapher! Several users have expressed their desire to easily go between Plot Document and Pages on other documents. Now you can do so without a cumbersome copy/ paste maneuver!

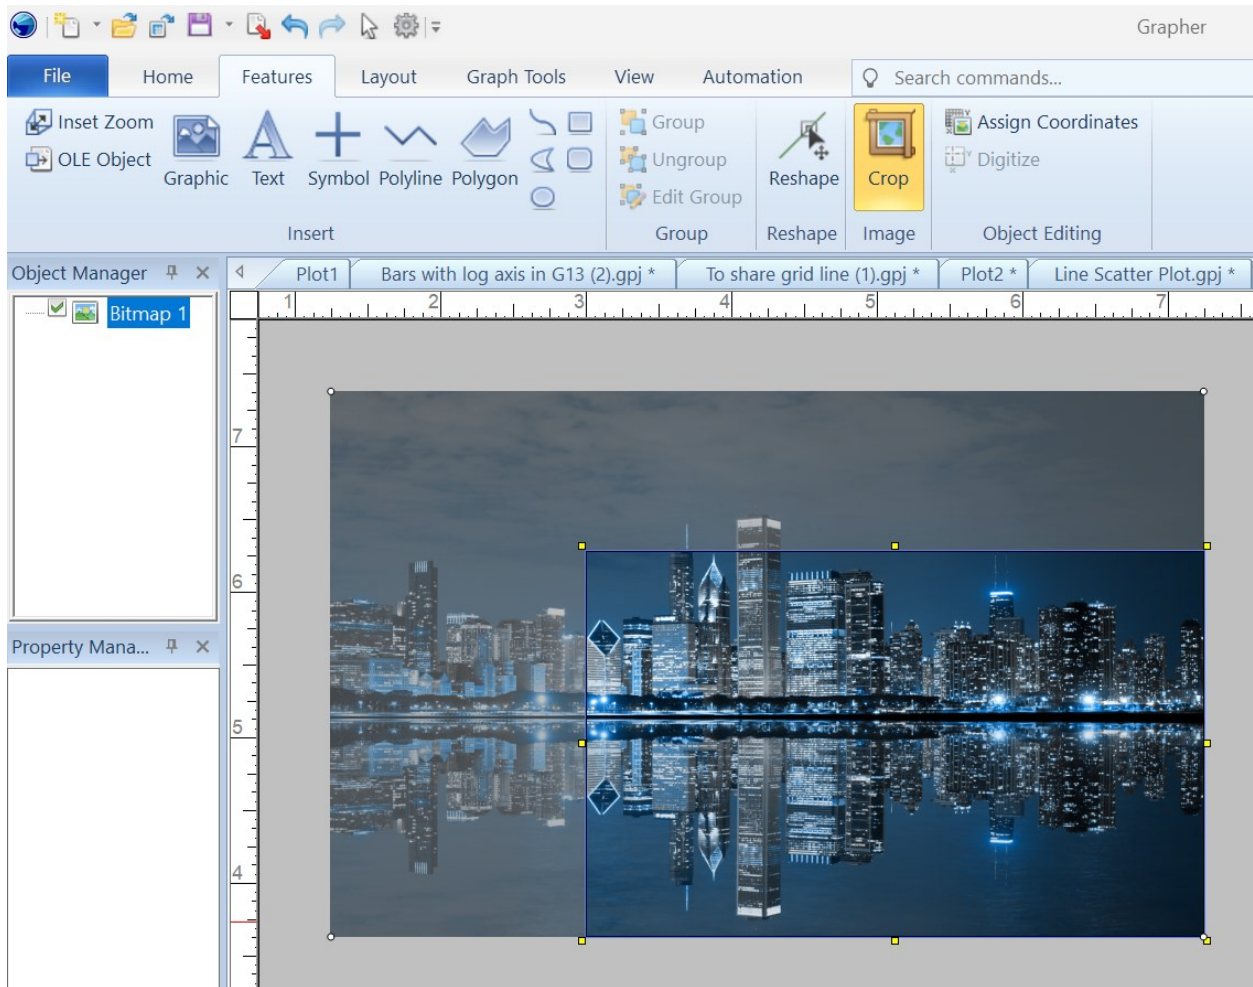

One doc, several pages   **Several docs**

Now users can easily shift around their pages and organize their documents to their hearts desire.
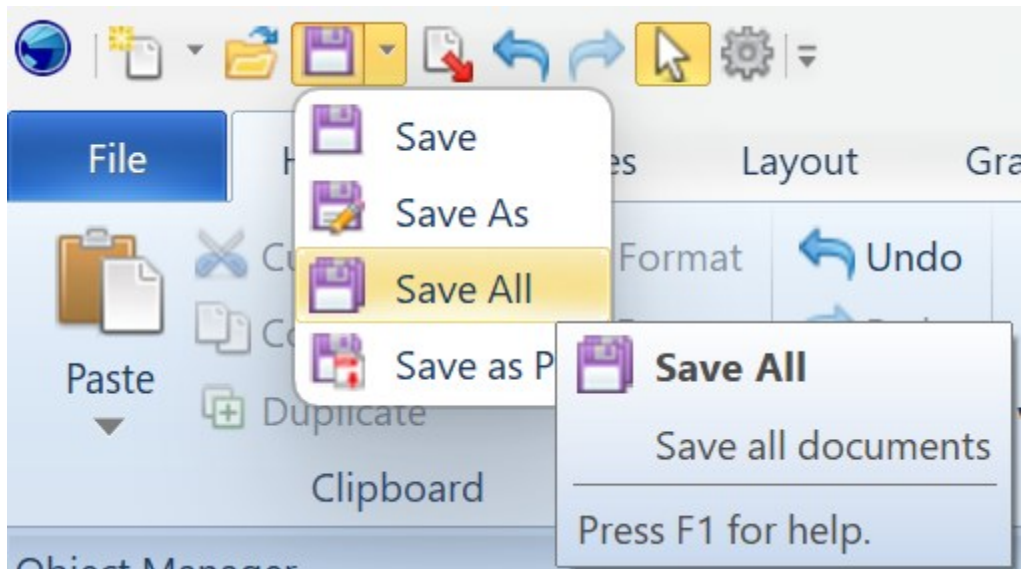

Crop Images

Here is a feature that needs no preamble: Image cropping! This longtime Surfer feature is sure to come in handy for Grapher users who insert images alongside their charts!!

File | Save All

Are you the kind of person who has 100 browser tabs open at once? Then this feature is for you! No bells and whistles, just a straightforward Save All option!
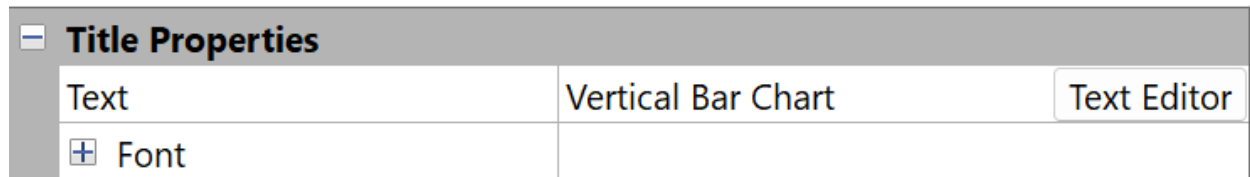

**Discoverability Improvements:**

Plot Fill Gradient Properties

Gradient properties were previously hidden inside an accordion and under overridden properties, which confused users.

Text Editor Icon

Title Properties

Text	Vertical Bar Chart	Text Editor
⊞ Font		

New users rarely intuited the function of the old Sigma icon Σ. No more room for interpretation!

Multi-Plot Graphs

Object Manager

☑ XYZ Horizontal Floating Bar Chart ➕
  ☑ XYZ Floating Bar Chart 1
  ☑ Z Axis 1
  ☑ Y Axis 1
  ☑ X Axis 1

Users can instantly add plots to any Graph by clicking the familiar green + button! It even turns yellow when your mouse goes over it... New users will now visually grasp this functionality, leading to multi plot Graphs earlier in the user experience!
